EXPERIENCE

Machine Learning Group, **Microsoft Research Asia**　　　　Sep 2018 – Jun 2019
- **Research Intern** (Mentor: Dr. Jiang Bian, Co-mentor: Dr. Wei Cao)
- My work mainly focuses on massive highly imbalance classification and its application on intelligent logistic. We proposed a general ensemble framework that can greatly boost canonical classifiers' performance on highly imbalanced data while being computationally efficient.

Laboratory of Cybernetic Intelligence, **Jilin University**　　　　May 2017 – May 2018
- **Undergraduate Research Assistant**
- We designed and built a prototype of auto-recharge system for multi-rotor UAV, including a ground station with its control program and a vision system which was used to navigate the precision landing procedure. This project has ¥10,000 RMB funding support from the Ministry of Education.
- I served as the **Program Leader** of a 4-person group. This project finally won the outstanding student project award.
